<b>Known Issues</b>	<b>8</b>

# Change Log

Date	Change Description
2016-07-06	Initial Release.

# Introduction

This document provides the following information about FortiHypervisor 1.0.0 build 0008.

- [Upgrade/Downgrade Information](#)
- [Product Integration and Support](#)
- [Known Issues](#)

## Supported Models

FortiHypervisor 1.0.0 supports the following models.

<b>FortiHypervisor</b>	FHV-500D
------------------------	----------

## Upgrade/Downgrade Information

This is the initial release, so there is no upgrade or downgrade applicable.

# Product Integration and Support

## FortiHypervisor 1.0.0 Support

The following table lists FortiHypervisor 1.0.0 product integration and support information:

<b>Web Browsers</b>	
<ul style="list-style-type: none"><li>• Microsoft Edge 25</li><li>• Microsoft Internet Explorer 11</li><li>• Mozilla Firefox version 46</li><li>• Google Chrome version 50</li><li>• Apple Safari version 9.1 (For Mac OS X)</li></ul>	
Other web browsers may function correctly, but are not supported by Fortinet.	
<b>Virtualization Guests</b>	
FortiGate KVM	5.4.1 This guest model is released on a special branch based off of FortiOS 5.4.1. As such, the Dashboard > System Information widget and the output from the <code>get system status</code> CLI command displays the build number as 7249. To confirm that you are running the proper build, the output from the <code>get system status</code> CLI command has a branch point field that should read 1064.
FortiVoiceEnterprise KVM	5.0.5
FortiManager KVM	5.4.1
FortiAnalyzer KVM	5.4.1
Linux VM Ubuntu	15.10
Windows VM	Windows 7 Professional

## Known Issues

The following issues have been identified in FortiHypervisor. For inquiries about a particular bug or to report a bug, please contact Customer Service & Support.

Bug ID	Description
366779	The following NP6 features are not supported in this release: CAPWAP offloading, NTrubo offloading, and SIT and IPv6 Tunnelling (IPTunnel) offloading. All other NP6 features are supported.
378246	The CLI help for setting the MTU value for an interface shows an incorrect MTU value range. The correct range is 68 - 9216.
378086	Error messages appear when performing a factory reset from the CLI.
373587	The Average Network Usage data displayed by the <code>get system performance status</code> command is incorrect.
373724	Guest data traffic can not be sniffed when NP6 offloading is disabled.
374084	CAPWAP traffic may experience packet loss.
373773	From the FortiHypervisor CLI you cannot sniff or monitor incoming traffic.
369970	You can import a VM image into FortiHypervisor even if the image limit has been reached. An error message will appear but the image is still imported.
367957	When you power off the FortiHypervisor from the GUI there may be a delay of a few minutes before the unit powers off if the system is busy.
368419	When configuring an interface for a guest VM, enabling MTU override and changing the MTU value has no effect on the size of the packets.
366705	FortiHypervisor does not support Content Processing (CP) acceleration for client VMs.
301496	Inline SSL IPS transactions may be dropped.
300514	Virtual MAC addresses generated by FortiHypervisor may not be in Fortinet's MAC address range.
302171	Some interface functionality changes unexpectedly if the interface is added to a virtual switch.
300404	The <code>get system interface transceiver</code> command is not available.
